PROFESSIONAL SUMMARY

BSIT 3rd-year student and full stack developer with 4+ years of coding experience, 10+ shipped projects, and 6 live deploys spanning AI, web, mobile, and government platforms. Lead developer of MathPulse AI — a 573-file production AI education platform with RAG pipelines, agent orchestration, and CI/CD on Docker + GitHub Actions. Open-source contributor to the CookieCloud MCP Server (AI agent browser auth) and Hermes Context Cache. Looking for an OJT placement to apply production engineering, AI integration, and design-system work to real customer-facing products.

CORE COMPETENCIES

Full-Stack Development (React + TypeScript + FastAPI) · AI / ML Integration (RAG, LLM Orchestration, Embeddings) · Production Engineering (Docker, CI/CD, Automated Tests) · Mobile (React Native, Capacitor, PWA, Tauri) · Design Systems (Tailwind, Glassmorphism, Figma) · Cloud (Firebase, Vercel, Hugging Face) · Databases (Firestore, PostgreSQL, ChromaDB) · Adobe Creative Suite (Photoshop, Premiere Pro, After Effects)

WORK EXPERIENCE

MathPulse AI — Lead Developer 2024 – Present

AI-powered math education platform (573 source files, 923 commits, 68 branches)

- Built RAG pipeline (ChromaDB + BAAI/bge embeddings), AI agent tutor with streaming and completion repair, and risk-classification pipeline (XGBoost + SHAP) for at-risk student detection.
- Architected 16,882-symbol knowledge graph (580 functional communities, 300 execution flow chains) with 7-8 step call chains from UI to AI inference to Firestore.
- Production engineering: Docker, GitHub Actions CI/CD, automated tests, model hot-swap system, Hugging Face deployment.
- Stack:** React 18, TypeScript 5.9, Vite 6.3, Tailwind CSS 4, FastAPI, Firebase, DeepSeek API, ChromaDB, Hugging Face, XGBoost.

Independent Projects — AI Automation Developer 2025 – Present

- Shipped **CookieCloud MCP Server** (open source): Model Context Protocol server for fetching and decrypting browser cookies, enabling AI agents to operate authenticated browser sessions.
- Built AI coding agent pipelines with multi-step automation, guardrails, error recovery, and systematic prompt versioning with A/B testing.

PlayVerse Ops (GameCon 2026) — Operations System Developer 2025

Real-time event operations (COED Building, March 5-6, 2026)

- Built real-time operations dashboard (live headcount, shift scheduling, role tasking, incident logging, budget monitoring) with Firebase Firestore sync and role-gated access.
- Deployed as PWA with native Android (Capacitor) and desktop (Tauri) wrappers.

RCBC Debt Tracker — Mobile-first PWA Developer 2025

- Built Liquid Glass design system (glassmorphism, backdrop blur, RCBC Blue banking theme) with offline-first architecture and Firebase sync.

SELECTED PROJECTS

Zhi Wei Zai (Restaurant Website) 2025 · Live

zhi-wei-zai.vercel.app — HTML, CSS, Firebase

V-Serve ARTA Analytics 2025 · Live

v-serve-arta-feedback.vercel.app — Dart

Digital Classroom PLV 2025 · Live

digital-classroom-reservation-for-plv.vercel.app — TypeScript

CookieCloud MCP Server 2025 · Open Source

github.com/Deign86/cookiecloud-mcp-server — TypeScript, MCP

Hermes Context Cache 2025 · Open Source

github.com/Deign86/hermes-context-cache — Python

EDUCATION

Pamantasan ng Lungsod ng Valenzuela

2023 – Present (3rd Year)

BS Information Technology — Valenzuela City, Philippines — consistent honor student, completing 300+ hour OJT practicum

Our Lady of Lourdes College

2020 – 2022

Senior High School, ICT Track — Valenzuela City, Philippines

St. Louis College of Valenzuela

2016 – 2020

Junior High School — Student Council Member, consistent honor student

SKILLS

Languages: TypeScript, JavaScript, Python, Dart, SQL, HTML5, CSS3

Frontend: React 18, Next.js, Vite 6.3, Tailwind CSS 4, shadcn/ui, Framer Motion, Recharts, KaTeX, Radix UI

Backend: FastAPI, Django, Node.js, Firebase (Auth, Firestore, Cloud Functions, Storage), REST APIs, PostgreSQL, MongoDB

AI/ML: RAG Pipelines, ChromaDB, BAAI/bge embeddings, DeepSeek, OpenAI, Claude, Hugging Face, XGBoost, SHAP, Model Hot-Swap

Mobile / PWA: React Native, Capacitor, Tauri, Native Android Wrappers, Offline-first Architecture

DevOps: Docker, GitHub Actions, CI/CD, Vercel, Hugging Face Spaces, Automated Testing

Design: Figma, Tailwind CSS, Glassmorphism, Design Systems, Adobe Photoshop, Premiere Pro, After Effects, Illustrator, Lightroom, XD, DaVinci Resolve, Blender

Practices: Code Reviews, Agile/Scrum, REST API Design, A/B Testing, Prompt Versioning, Technical Documentation, Production Engineering
